

## Peer Review and Credentialing

SettlePou's Health Care group represents providers in all phases of credentialing and other peer review actions, from pre-hearing counsel and negotiation, to administrative hearings and litigation. The Health Care group recognizes that these issues are the most personal and important to a provider and handle these issues accordingly. The group counsels the provider every step of the process regarding the impact of a particular action or decision and further counsels the provider where an action may result in being reported to the national database.
